1. Novelty and Inventive step

The problem to be solved is to provide an improved television antenna. For this purpose, the present invention is comprised of an insulation rod section, a multiple-stage rod section, a helical antenna.

D1-D5 are mainly related to antenna for mobile communication terminal. Specially in case of D4, there are a knob(12), a spring antenna(20), a antenna rod(16) in figure 1. That the antenna rod(16) is extendable in two stages is similar to present invention too. But all D1-D5 are the art of mobile communication, isn't the art related to television.

Therefore, the claims 1-5 are considered to be new and to involve an inventive step.

2. Industrial applicability

Claims 1-5 meet the criteria of PCT Article 33(4) because it can be used in mobile communication industry.
